The hunger for sexual pleasure can be nourished in many ways. For instance, some people want hours of passionate sex while others crave the freedom of a lunchtime quickie. Certain individuals may settle on a lover just because the sex is good, but what if a birth date could reveal more on how to have mind-blowing sex? Sextrology, the connection between astrological sun signs and sexual activity, may help an individual discover which under-the-sheets partner is more suited for him or her.

Remy Fahad, a student at Seminole State and a Scorpio, said he has heard of astrology but is “unfamiliar” with sextrology.

The 12 sun signs of the zodiac may speak volumes when it comes to an individual’s favorite position, naughty secrets and greatest sexual partners.

Marissa Laskoski, a student at Seminole State and a Gemini, also said sextrology was unknown to her but now considers the possibility of its accuracy after knowing what it means.

“I do believe in sextrology because everyone has their different views on sex—so they will have a different definition toward it,” she said.

The planet Mars plays an important role in determining an individual’s sexual personality according to Kelly Lowe, astrological counselor, teacher and author of An Astrologer’s Journey.

“You have to look at the total picture to see the sextrology of a certain person and what drives their motor,” she said, adding that the zodiac’s sun signs also play a big part in sextrology—it shows how attitudes vary toward sex and how different people approach sex.

Ms. Lowe said she does not like to “label” each sun sign because other factors should be taken into consideration for a sexual analysis to be cut in stone. However, she described the following as typically expected of each sun sign:

**ARIES** — If an Aries get bored, he or she will take the nearest exit. He or she can be here today and gone tomorrow; as soon as the interest is gone, so is an Aries.

**TAURUS** — A Taurus enjoys the comfort of having his or her partner or date nearby. He or she tends to be romantic and likes to caress and cuddle.

**GEMINI** — A Gemini is about communication and is not afraid to talk about sex first. If sex with a Gemini is pursued, there better be some conversation to back it up.

**CANCER** — It’s not about the sex when it comes to a Cancer. Cancers are sensitive and more tied to his or her emotional feelings rather than the act of sex itself.

**LEO** — Leos’ enjoy receiving compliments and taking center stage when it comes to sex.

**VIRGO** — There are two sets of Virgos. One can be extremely sexual. The other Virgos are critical. Virgo seems to be the sun sign most concerned with sexually transmitted diseases.

**LIBRA** — It is all about the setting for a Libra. He or she enjoys romance and flowers. Libras’ are about partnership and prefer talking about sex before actually doing it.

**SCORPIO** — This is the sun sign with the highest sexual drive; the sign that tends to think of sex the most. Scorpions’ tend to be jealous and possessive. A Scorpio will prefer to have sex first and find out more about his or her partner later.

**SAGITTARIUS** — Sex should be full of adventure for a Sagittarius. This is a free-spirited sign that appreciates his or her space and freedom. A Sagittarius tends to enjoy the outdoors. If a Sagittarius gets committed to a relationship, it is typically later in life.

**CAPRICORN** — Capricorns may sometimes look at the big picture rather than being driven by sex. In result, he or she may treat sex like a business transaction by looking for secure outcome. This sign is typically not driven by sex. Making an appointment for sex might be helpful.

**AQUARIUS** — These are the inventors of the zodiac. Aquarius is more inclined to try out different positions. This sign is unique and follows his or her own rules.

**PISCES** — A Pisces is sensitive and is driven by love and his or her feelings rather than sex. He or she would not be opposed to let music and candles set the mood.

The idea of using sextrology to help people find great sex and overall compatibility may be considered foreign to some but can be highly recommended, Ms. Lowe said.

“Sextrology isn’t a word you see in the news or widely publicized, but I think it’s important,” she said, “I think people can use it to their benefit.”
